

TABISH AHMAD

Aspiring Data Analyst | Python • SQL • Power BI • Data Visualization
Varanasi, Uttar Pradesh | 7275768273 | tabishansari1975@gmail.com | linkedin.com/in/tabish-ahmad

PROFESSIONAL SUMMARY

BTech Computer Science graduate with hands-on experience in Python, SQL, and Power BI, focused on turning raw data into clear, actionable insights. Skilled in data cleaning, exploratory data analysis (EDA), and dashboard development through end-to-end analytics projects. Completed an AI/ML internship that strengthened practical exposure to model development and applied problem-solving. Committed to supporting data-driven decisions through accurate, well-structured reporting.

TECHNICAL SKILLS

Programming & Data Analysis: Python, Pandas, NumPy, Data Cleaning, Exploratory Data Analysis (EDA)

SQL: Data Analysis, Data Aggregation, Relational Databases, Querying, Data Filtering, Sorting, and KPI Analysis

BI & Visualization: Power BI (Data Modeling, Relationships, Calculated Columns, Visualizations) — Currently Learning; Chart.js, Data Visualization

Data & AI: NLP, Scikit-Learn

Excel: Core functions; building hands-on practice with pivot tables and VLOOKUP/XLOOKUP

Tools: Git, GitHub, VS Code, Jupyter Notebook

INTERNSHIP EXPERIENCE

AI Developer Intern — Web Rumi | June 2025 – August 2025

- Worked as an AI Developer Intern, contributing to AI/ML development and working models.
- Gained hands-on experience applying AI/ML concepts to practical problems and developing AI-based solutions.
- Contributed consistently to assigned development tasks while gaining practical experience in AI/ML workflows.

PROJECTS

Pizza Sales Analytics System | Python, SQL, Chart.js

- Analyzed a 10-table relational sales dataset using SQL joins and aggregate functions to calculate revenue, order volume, and average order value KPIs.
- Built daily and monthly order-trend, category, and size-based sales breakdowns using GROUP BY queries and Chart.js visualizations to surface demand patterns.
- Developed filterable sales reporting with CSV export, enabling category- and date-range-based analysis of order-level transaction data.
- Modeled the dashboard around a Power BI-style KPI and report layout to translate raw transactional data into an interpretable analytics view.

EvalAI — Career Guidance System | Python, NLP

- Built a repository evaluation system that analyzes source code using AST-based code analysis and NLP techniques to assess technical profiles.
- Designed a weighted scoring framework across multiple metrics, applying evaluation and risk-analysis logic to score coding proficiency and profile quality.
- Generated structured evaluation results that translate analysis output into skill-gap identification and career development roadmaps.

AI-Daily Briefing | Python, LangChain, ChromaDB, Google Gemini 2.5 Flash, RAG

- Built a data ingestion pipeline using Python to collect and structure news data from verified web sources for analysis.
- Applied sentiment and credibility analysis to evaluate and categorize incoming data.
- Implemented a retrieval-augmented (RAG) system with contextual memory to support organized, query-based access to processed data.

EDUCATION

B.E. — Computer Science and Engineering

Institute of Engineering and Technology, Dr Bhimrao Ambedkar University, Agra | 08/2022 – 06/2026

CERTIFICATIONS

Udemy Certified Python Developer • Introduction to Data Science • Certified in Python — Geekster • AI Foundations Associate — Oracle
• The Ultimate Python Bootcamp — Hitesh Chaudhary (Udemy) • NumPy, Pandas & Python for Data Analysis — Udemy
